

Frequently Asked Questions

Topic: CAMM-1 Model PNC-1000

ST51700

1. I'm using the PNC-1000 with a Windows® 95 driver. What do I do when I get an "Error 3 Bad Parameter"?
 - First, lift the material handle to the release position. Select Size, Free-Y and click Enter.
 - Set your Roland Driver to Rotate 90 or Landscape position.
 - In your software layout menu select Landscape.
 - If you are using pinch roller #1 for 20" wide vinyl, set driver size to 18.5" width and 59" length. If you are using pinch roller #4 for 15" wide vinyl, set driver size to 13.5 width and 59" length.

Note: These instructions are exclusive to the PNC-1000. Camm-1 machines should usually be set to Expand-X or Rotate 90 (with signmaking software).
