

SUBTRACTIVE RAPID PROTOTYPING

CAN YOUR 3D PRINTER DO THIS?

SRP milled wooden prototype

“Design and technology together create excellent products. With Roland milling machines, our chances of success are immeasurably increased.”

Marcus Anlauff **Mango Design**

Prototype created with wood, plastic and aluminum parts

Model shown is MDX-540A

What are the advantages of SRP over 3D printing? Lower equipment costs. Greater precision. Better surface finish. Wider variety of materials. And we're just getting started. To learn more, visit our website for a video demonstration.
