INTRODUCING THE NEW ROLAND PRO II V SERIES. OUR BEST INKJETS EVER.

Our PRO II Series has established itself as the gold standard for high-performance inkjets, delivering stunning print quality, outstanding production speed, and integrated print/cut capability*. Vibrant Eco-SOL INK adds the unique ability to print beautifully on both uncoated and coated media. Over the years, we've earned a reputation for solid, sophisticated engineering backed with passionate support.

Now, we've decided to improve a good thing. The result is our new SOLJET PRO II V Series...a higher gold standard. We've added print modes, boosted print speeds, enhanced media handling and control, and upgraded the heating systems. A CCMYK option is now available on print-only models to enhance color density and print speed. Best of all, the V Series comes standard with VersaWorks™, Roland's all-new advanced software RIP. This feature-rich package is packed with valuable color management and cut control options. The only thing that hasn't been upgraded is the price. So now, more than ever, value begins with a V.

Built with precision. Backed with passion.

Roland PRO II V Series

- Eco-SOL INK
 - > Prints on both uncoated and coated media
 - > Water, scratch and UV resistant graphics up to 3-years outdoors*
 - > No harmful VOCs, no special ventilation required
- Enhanced Print Speeds
 - > 315 sqft/hr print speed at 450 dpi on SC Model
 - > 340 sqft/hr print speed at 360 dpi on SJ Models
- Accurate die-cutting with Quadralign™ optical registration**
- Up to 1440 dpi resolution
- Variable droplet technology
- High-speed ethernet connectivity
- Average running costs (ink and media) of 65 cents
- Advanced heating and media handling systems
- Media counter

* Outdoor durability is based on accelerated weather tests. Results may vary depending upon location and application. Dry times vary depending on specific media characteristics. Lamination may be required for some applications or environmental conditions. ** SC Model only.

INCLUDES ROLAND VERSAWORKS™ Advanced Color Management and Contour Cutting From One Easy-To-Use Screen

One of the major advances in the PRO II V Series is the introduction of VersaWorks, an all-new, advanced RIP package composed by Roland expressly to optimize V Series performance. This powerful package builds on Roland's advanced RIP technology to give you even greater control over both color and contour cutting. VersaWorks is built upon a genuine Adobe® PostScript® 3™ CPSI™ engine, supporting the industry's widest range of file formats.
