Topic: MPX-50: What is firmware and why do I need to be concerned about it?

ST91400

What is firmware and why do I need to be concerned about it?

Firmware contains the internal instructions for a MPX-50. For example, firmware includes the commands to tell the MPX-50 head where to move and when to impact. As improvements are made to the current firmware, they are made available via downloadable files on the Roland web site. You can easily upgrade your firmware by installing the latest version on your MPX-50.

Roland's web site features downloadable firmware <http://www.rolanddga.com/support>
