PRINT/CUT SOLUTION

- Any commercially available printer which has a Windows or Adobe PS print driver.
- Roland CutStudio or Adobe Illustrator 9, 10, CS or CS2 (with CutStudio Plug-in installed).
- GX-24 Supports via 3 point optical registration.
- GX-Pro Series Supports via 4 point optical registration.
- SV Series Supports via manual registration (done when cut file is sent after printing).

NOTES:

* Requires installation of the Windows Print (CAMM-1, CAMM-1 Pro or STIKA) Driver in order to function properly. The ports supported on the Windows platform are (COM, LPT and USB).

** CS2 requires manual installation of the Plug-ins.
