

## **Roland Film Design**

Roland Film Design™ is revolutionary design software that has opened up the window tinting business to auto dealerships and restyling professionals. Loaded with powerful design features, Film Design can be used with any brand of vehicle window tint film.

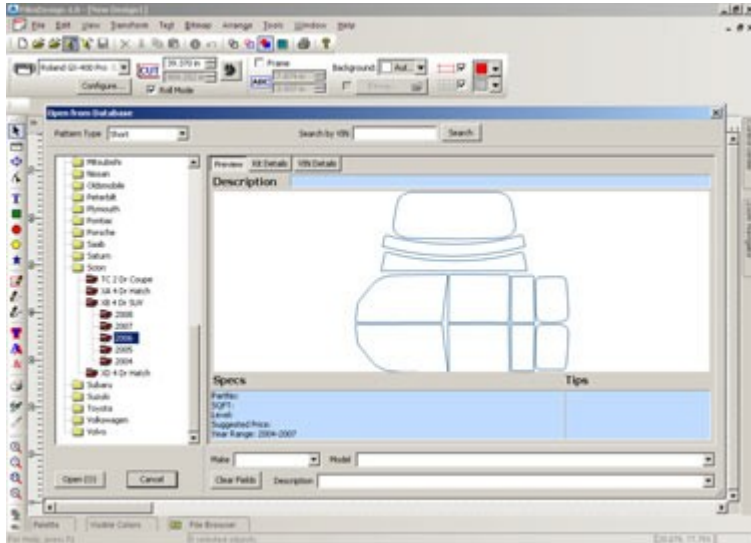

- Compatible with all brands of window tint film
- Powerful design tools for editing patterns and designs
- More than 2,000 different window film pattern kits
- Optional upgrade 2,000 database of urethane paint protection
- Creates signs, banners, and decals

## **Roland Film Design Features**

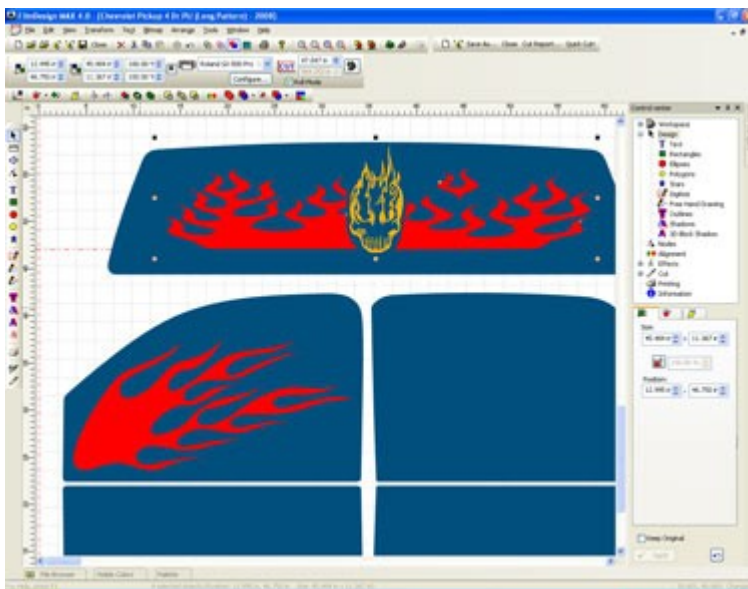

Film Design makes it possible to use any type of window tinting film or paint protection film on the market. This freedom of choice is an industry first, making it easier than ever to successfully add window tinting to your business!

## Over 2000 Patterns

Film Design Basic includes 10 pattern kits, with more available for purchase. Film Design Pro provides unlimited use of more than 2,000 different window film pattern kits that cover more than 1,000 different vehicles. Annual database updates are \$300 and \$1200 respectively. An optional upgrade package offers access to an equally vast database of urethane paint protection kits. The patterns can be re-used over and over without the per-cut fee associated with other programs on the market.

## Powerful Design Capability

The software makes it possible to add designs, logos and text to window film patterns. With several unique editing tools, this powerful design software can even create signs, banners and decals. It imports both AI and EPS files and can save changes directly to a local computer.

## Roland FilmDesign™ Software Features
