

Roland JewelMill CAM Software Solution

Frequently Asked Questions

Q. What is JewelMill?

A. JewelMill is a powerful software solution that will allow JWX-30 users the ability to easily create tool paths for your jewelry pieces within Roland's JewelStudio software. JewelMill provides powerful CAM software for jewelers within a simple, easy to use interface.

Q. What are some of the key features and benefits of JewelMill?

A. Below are some of the key features and benefits of JewelMill.

- The JewelMill software works within Roland's JewelStudio make it simple and easy to design jewelry models and produce the models on the JWX-30. There is no need to export or transfer files from your design software to your CAM software.

- JewelMill works within JewelStudio and uses the same surface data to create toolpaths. There is no mesh that needs to be created or different quality of meshes required. Parts will come out smoother and take less time to process.

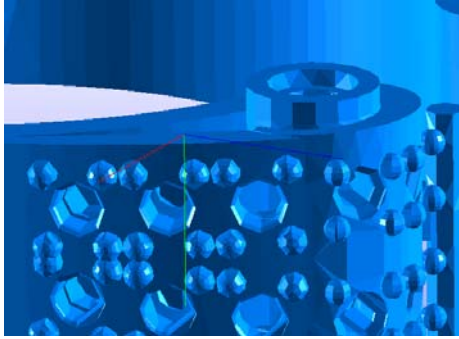

- Built on Roland's legendary ease of use, this program is very simple to use. It is a wizard based program that is intuitive and requires no learning curve. Users will be cutting parts quickly and with the speed of an expert.

Q. What are the differences between JewelMill and SRP Player?

A. JewelMill is completely different from SRP Player. Although the wizard based ease of use interface is similar, the tool processing time and tool process efficiency is greatly improved. Tool processing time is reduced by 70% when using JewelMill vs. SRP Player. Model cutting times are reduced by up to 50%.

Q. What are the differences between JewelMill and other similar CAM software packages?

A. JewelMill works within JewelStudio, saving time by not having to export files then import into a separate software program. You will also not compromise model quality by converting the smooth surface data of JewelStudio to a mesh file required by similar CAM software packages as seen below. JewelMill processing time is reduced by 65% and model cutting times are reduced by up to 20%.

Q. What is the list price of the software?

A. JewelMill Software is now included with the JWX-30. For those JWX-30 owners that already have a JWX-30 and would like to upgrade to the new JewelMill software, the list price is \$995.

Q. When will JewelMill be available?

A. JewelMill is available now.

Q. What are the system requirements for JewelMill?

A. JewelMill will have the same requirements as our JewelStudio software.

Operating System	Windows Vista (32-bit only), Windows XP (32-bit only)
CPU	Intel Dual Core 3.0 GHz CPU or faster is recommended
RAM	2GB or more is recommended
Video card and monitor	Monitor supporting 1280x1024 or more is recommended, 32-bit true color required
Available Hard disk space	2GB or more
Optical drive	DVD-ROM drive
Interface	USB port for USB security dongle

Q. On how many computers can I install this software?

A. The software can be installed on multiple computers, but can only be used on one computer at a time due to the included single USB security dongle.

Q. Do you offer floating, network, or concurrent licenses?

A. No we do not.
