

Alibre CAM 1.0

The Alibre CAM family of machining products, from Alibre Inc, is built on VisualMILL technology that is in production at thousands of locations worldwide. From simple 2-1/2 axis to full 5-axis indexed milling, Alibre CAM will help you make parts, fast. The Alibre CAM family of products offers several options to fit your machining needs. All Alibre CAM products are fully integrated with Alibre Design from Alibre Inc, offering an intuitive combined user interface for CAD and CAM, fully associative toolpath updates, and a wide variety of post processors. Compared to a stand-alone CAM system, Alibre CAM will save you countless hours by automatically updating toolpaths when your model changes. And being integrated with Alibre Design means you only have one interface to learn, saving even more valuable time. This fully associative parametric CAD/CAM system makes Alibre CAM far and away the best value in the CAD/CAM industry.

Alibre CAM is marketed, sold and supported fully by Alibre Inc. For more information browse to the Alibre Inc web-site at <http://www.alibre.com>
