

VisualART

VisualART 1.0: VisualART is a VisualCAM 1.0 plug-in used to convert artwork into geometry suitable for machining. This plug-in introduces exciting new modeling techniques for modeling artistic shapes using raster bitmap images. Used in conjunction with VisualCAM's 3D modeling tools, it offers a complementary set of modeling techniques for jewelry design, sign making and model making.

NOTE: VisualART 1.0 is a plug-in that requires VisualCAM 1.0 to be installed in order for it to run. It is not a standalone application.

VisualART FEATURES

Geometry Creation	VisualART
3D Relief from image files (jpg, gif, bmp)	✓
Ability to limit creation of reliefs using colors and/or curves	✓
2D Curve geometry from image files (jpg, gif, bmp)	✓
Create puffed up volumes using closed curves	✓
Create sweep volumes using various profiles	✓

Mesh Export	VisualART
Open Mesh	✓
Water Tight Closed Mesh	✓
Water Tight Closed Mesh with Mirrored Mesh	✓
Mesh Decimation on Export	✓
