SpaceClaim On-Line Training

SpaceClaim Client Services offers a wide range of On-Line Training Webinars that cover SpaceClaim Fundamentals, Conceptual Design and Importing and Modifying classes as well as Detail Drawing, Sheet Metal and Manufacturing Engineering.

Why should you avail yourself to this free, On-Line Training?

- A certified SpaceClaim Instructor will present all of the courses offered in a interactive and enjoyable format.
- The customer (you and your employees), will benefit from this training by developing a close relationship with SpaceClaim.
- Issues that arise during training, for example, submitting enhancements, can be quickly acted upon by the instructor.
- It is very important that your Application Engineers learn the logical connections that exist in SpaceClaim. A comprehensive training program will teach these concepts and the learning curve will be greatly enhanced.
- And finally, the classes can be adjust to your schedule and of course it is FREE!

There are currently seven courses offered:

- Fundamentals of SpaceClaim 2008 Professional Edition.
- Modeling in SpaceClaim 2008 Professional Edition.
- Conceptual Design in SpaceClaim 2008 Professional Edition.
- Importing and Modifying in SpaceClaim 2008 Professional Edition.
- Detail Drawing in SpaceClaim 2008 Professional Edition.
- Sheet Metal Design in SpaceClaim 2008 Professional Edition.
- SpaceClaim 2008 Professional Edition for Manufacturing Engineering.

Please go to "www.myspaceclaim.com" for the descriptions of each course and registration for any one of them.
